Image file guidelines

Thank you for choosing CottonBee as your fabric printing company. To make the process of placing orders a bit easier for you, we've made guidelines for preparing your image files.

Name	include the size of the image, type of fabric and the overall length in centimeters, e.g. "filename_25x25cm_satin_500cm.jpg"
Format	.jpg, .png, .tiff with LZW compression
Scale	we print in 1:1 scale, so make sure your file is saved in a proper size
Resolution	min. 150 dpi
Color palette	color profile CMYK U.S. Web Coated (SWOP) v2, the sum of all CMYK colors should be below 230% to prevent flooding
Length	The file must be at least 1 meter in length, but not longer than 5 meters. Always round up the file length to a number divisible by 10. For a 1,47 m file, round up the length and save it as a 1,5 m file.
Size	max. 1,5 GB
